

Children's Mental Health Matters!

a Maryland public awareness campaign

Facts For Educators

School Services

School is a major part of a child's life and a child with mental health needs can experience challenges that make it difficult to be successful in school. You may need to collaborate with other school personnel to best support your students. Your school does provide a range of services that can help each child succeed.

Individualized Education Program (IEP)

Children with more intensive mental health needs may qualify for special education services under the federal law called Individuals with Disabilities Education Act (IDEA). IDEA requires that children with a disability receive additional services (IEP) to help them in school. A child with mental health needs must show certain characteristics to qualify for special education as a child with an "emotional disability."

"(i) Emotional Disability is a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree that adversely affects a child's education performance:

1. an inability to learn that cannot be explained by intellectual, sensory, or health factors
2. an inability to build or maintain satisfactory interpersonal relationships with peers or teachers
3. inappropriate types of behavior or feelings under normal circumstances
4. a general pervasive mood of unhappiness or depression
5. a tendency to develop physical symptoms or fears associated with personal or school problems

(ii) Emotional Disability includes schizophrenia. The term does not apply to children who are socially maladjusted, unless it is determined that they have an emotional disturbance."

In addition, in order to be eligible for services under IDEA, the student, by reason of their disability, must require special

education and related services."

Note that the definition of Emotional Disability is not a diagnosis or medical term, but rather a term used in the federal education law to designate eligibility for special education. Under IDEA, if a child is found eligible, the student is entitled to an Individualized Educational Program (IEP) that is designed to meet their unique needs.

It is important to know your rights. A Parents Guide to Understanding Your IEP: Rights and Responsibilities can be found at <http://marylandpublicschools.org/programs/Documents/Special-Ed/IEP/IEPParentsGuide2016.pdf>

504 Plans

Children with mental health needs who do not qualify for special education may qualify for services under another federal law. Section 504 of the Rehabilitation Act's definition of disability is broader than the IDEA's definition. To be protected under Section 504, a student must be determined to: have physical or mental impairment that substantially limits one or more major life activities; or have a record of such an impairment; or be regarded as having such an impairment.

Examples of what might be included:

- Adjustment to test taking (more time, questions given orally)
- Seating near the blackboard or near the teacher
- Excused from class to take medications
- Allowed to eat in class because of diabetes

A MARYLAND PUBLIC
AWARENESS CAMPAIGN

coordinated by

mhamd
MENTAL HEALTH ASSOCIATION OF MARYLAND

MCF
maryland coalition of families

Who is responsible for a 504 Plan?

- The student (if appropriate)
- Parent or Legal Guardian
- Teacher
- Administrator
- School 504 Coordinator (may be a staff person on the Student Support and/or Child Study Teams)

Others who may be included, as appropriate:

- School Counselor, Social Worker and/or Psychologist
- Physician, Psychiatrist, or other health professional
- Mental Health Clinician
- Speech/Language Pathologists
- Occupational Therapist/Physical Therapist

Center on the Social and Emotional Foundations for Early Learning (CSEFEL)

In Maryland, CSEFEL is focused on promoting the social and emotional development and school readiness of young children between birth and five years of age. CSEFEL's Pyramid model is being integrated into the effective practices to enhance young children's social and emotional competence and to prevent challenging behaviors.

Positive Behavioral Interventions and Supports

PBIS Maryland has been implemented in more than 900 schools across all 24 local school systems. The goals of PBIS are to promote a positive school climate, reduce disruptive behaviors, and create safer, more effective schools for all students. The emphasis of PBIS is on rewarding positive behaviors rather than focusing on reactive, punitive practices. <http://pbismaryland.org/>

Medication at School

Sometimes it is necessary for children to take medication during school hours. Schools have very strict regulations governing medications at school. A form completed by a child's doctor is required and can be downloaded from the Maryland State Department of Education website:<http://marylandpublicschools.org/about/Documents/DSFSS/SSSP/SHS/medforms/medicationform404.pdf>

All medication must be in containers labeled by the pharmacist or doctor and an adult must bring the medication to school. Non-prescription medication must

be in the original container with the label intact.

The Children's Mental Health Matters! Campaign is a collaboration of the Mental Health Association of Maryland (MHAMD) and the Maryland Coalition of Families (MCF) with support from the Maryland Department of Health - Behavioral Health Administration. The Campaign goal, with schools and community champions across the state, is to raise public awareness of the importance of children's mental health.
