Doctors are looking for children and teens with Bipolar I Disorder for a research study.

If you think your child may have a mental health problem, a local research study may be an option.

If enrolled, your child will receive at no cost:

- Investigational medication for Bipolar I Disorder
- Study-related care from a local doctor
- Compensation up to $45.50 per study visit for time and travel

To qualify, your child must:

- Be age 10-17 years old
- Have Bipolar I Disorder
